

AX

AIX ALEPH

INVESTOR BRIEF

The Urban Operating System for E-Mobility Infrastructure

2026 · Pre-Seed · Confidential

Not a dashboard. Not a SaaS tool.

The operative infrastructure layer for fleet, energy, compliance, and governance — in production.

EXECUTIVE SNAPSHOT

CATEGORY

Infrastructure Software — Urban E-Mobility OS

PRODUCT STATUS

Live in production · api.aixaleph.com · No demo mode

MODULES

Fleet · Personal · Energy · Cost · Security · Compliance · Governance · Telematics
M2M

TECH STACK

Next.js 16 · Express · PostgreSQL · Prisma · Docker · IONOS VPS

SECURITY

JWT fail-closed · DB-backed API keys (SHA-256) · Session audit

STAGE

Pre-Seed · First pilot operator onboarding

MARKET

> \$1T E-Mobility global by 2030 · No dominant OS-layer player

REVENUE MODEL

Enterprise SaaS License · Telematics API (M2M) · Compliance Module · Integration
Services

THE INFRASTRUCTURE THESIS

AIX ALEPH is not a fleet dashboard. Not an analytics tool. Not another SaaS product.

AIX ALEPH is the operative infrastructure layer — the OS that connects fleet, personnel, energy, cost, security, compliance, and governance on a single platform.

Fleet operators, energy planners, and compliance teams work in silos today.

Fleet data is isolated. Energy data is isolated. Reporting is reactive.

Integration is manual, error-prone, and expensive.

AIX ALEPH closes this gap — not with another integration tool, but with a unified operative layer. The difference between a tool and an operating system.

Comparison: What SAP did for ERP, what Palantir did for data fusion — AIX ALEPH does for urban E-Mobility infrastructure.

WHY NOW

- EU Taxonomy + CSRD: mandatory sustainability reporting for fleets
- CO2 fleet limits: regulatory pressure on every fleet operator
- Urban emission zones: combustion bans accelerating E-fleet transition
- No dominant OS-layer exists for this market — AIX ALEPH builds it

90-DAY INVESTOR-READINESS ROADMAP

Week 1–2

IR page live · Investor Brief PDF deployed

Week 3–4

Guided Demo bookable · One-Pager finalized

Week 5–6

Proof Pack: Uptime · API Contract · Audit sample

Week 7–8

Gated access for qualified investors

Week 9–10

Investor CRM setup · Pipeline stages defined

Week 11–13

First qualified conversations · 5+ demo slots

NEXT STEPS

1. Request Intro Call — ir@aixaleph.com
2. Guided Demo — 45 min, live production system, no slides
3. Due Diligence — Proof Pack, Architecture Docs, Audit Trail
